Subject (9087980) EPA Sampling

Jim and Cindy:

Due to Hurricane Ike, EPA has postponed its planned sampling activities associated with the Delfasco, NE 15th Street, and SE 14th Street sites. The new tentative date to begin field activities is October 15, 2008. This date is tentative and is dependent on the progress of EPA's hurricane response activities. I will let you know of any further changes as the hurricane response activities progress.

Thank you for your patience.
